PROFESSIONAL SUMMARY

Final-Year ECE student (graduating 2027) with production-deployed experience in Full-Stack Web Development and AI-integrated systems. Proficient in Python, Flask, JavaScript, MySQL, RESTful APIs, and cloud deployment. Expertise in Embedded Systems, VLSI Design, RF Communication, and UAV hardware. Nationally ranked coder (AIR 347) and published international conference presenter. Available for internship / full-time roles from 2025.

TECHNICAL SKILLS

Programming: Python, Java, C

Frontend: HTML5, CSS3, JavaScript (ES6), Fetch API, Promises, DOM APIs, Responsive Design, Mobile-First UI

Backend & DB: Python Flask, RESTful APIs, MySQL, SQL Query Optimisation, Relational Database Design

Core ECE: Embedded Systems, VLSI Design, RF Communication, PCB-Level Circuit Design, Arduino, UAV Systems

Tools & Cloud: Git, GitHub, VS Code, Arduino IDE, MATLAB, Multisim, Render (Cloud Deployment)

PROJECTS

AI Smart Agriculture Assistant

Python · Flask · MySQL · REST APIs · JavaScript · Render

- ▶ Architected a production-deployed, 3-tier AI agriculture platform with NLP interface delivering crop diagnostics, weather-adaptive recommendations, and pest-management — achieving <2s end-to-end query resolution.
- ▶ Developed full-stack app: HTML5/CSS3/JS frontend, Flask RESTful backend, MySQL relational layer; integrated 2 third-party REST APIs for real-time, data-driven decision support.
- ▶ Engineered intent-based query routing and optimised high-frequency SQL queries, cutting avg. DB response time ~30%; deployed on Render with 99%+ uptime.

Weather Dashboard

JavaScript (ES6) · HTML5 · CSS3 · REST API · Fetch API

- ▶ Integrated weather REST API via async JS (Fetch API / Promises) for real-time 5-day forecasts and geolocation-based updates with sub-second rendering.
- ▶ Designed responsive, mobile-first UI with dynamic condition-based theming and robust error-handling across 10+ weather states.

Browser-Based Code Editor

JavaScript · DOM APIs · HTML5 · CSS3

- ▶ Built browser-native editor (HTML/CSS/JS) with sandboxed iframe execution, real-time live preview, and zero-dependency client-side architecture — eliminating backend costs entirely.
- ▶ Implemented one-click export, dark/light theme toggle, and responsive layout improving developer accessibility across all devices.

RF Transmission Drone (UAV)

Arduino · RF Communication · Embedded Systems · PCB Design

- ▶ Designed, assembled, and field-tested RF-controlled UAV with KK 2.1.5 flight controller and 2.4 GHz wireless modules — stable autonomous flight over 50m range.
- ▶ Executed PCB-level circuit testing and firmware calibration across 3 iteration cycles; improved RF signal reliability by 40%, reduced instability to near-zero.

EDUCATION

B.Tech - Electronics and Communication Engineering

2023 - 2027

Pranveer Singh Institute of Technology, Kanpur

CGPA: 7.1 / 10

Intermediate (Class XII)

2022 - 2023

Shri Guru Ram Rai Public School, Hardoi

Percentage: 72.0%

High School (Class X)

2020 - 2021

Shri Guru Ram Rai Public School, Hardoi

Percentage: 79.4%

CERTIFICATIONS

- ▶ Oracle - Generative AI Professional
- ▶ NVIDIA - Getting Started with AI on Jetson Nano
- ▶ Simplilearn - VLSI Design & PCB Design
- ▶ Infosys Springboard - Python Programming
- ▶ Udemy - Full-Stack Web Development & C Programming

ACHIEVEMENTS

- ▶ **Top Finalist - TechExpo 2025** (PSIT Kanpur): Recognised among top competing teams for AI agriculture platform innovation.
- ▶ **International Conference Presenter - EACE-2025** (PSIT Kanpur): Delivered peer-reviewed technical paper at undergraduate level.
- ▶ **AIR 347 - CodeQuezt National Coding Challenge** (Naukri Campus): Top-percentile finish among thousands of engineering participants.
